Greensboro, NC – June 20 -23, 2025 – The world’s most provocative conference on ancient mysteries, heterodox science, and catastrophic history returns to Greensboro, NC, on the first weekend of summer for its third and most ambitious year yet. Cosmic Summit 2025 will feature over two dozen speakers from around the world, with a focus on new discoveries challenging mainstream narratives of human origins and global catastrophe.

Headliners include Randall Carlson, Dr. Robert Schoch, Ben VanKerkwyk, Dan Richards, and Praveen Mohan—cultural influencers and researchers with a combined 16 appearances on the Joe Rogan Experience. They’ll be joined by experts in geology, archaeology, mythology, and lost technologies to explore what may be a hidden chapter of human history.

This year’s program includes **Three Big Reveals:**

- A second **release of acoustic and radar scan data from beneath the Pyramids of Giza**, presented by the Italian “Khafre Project” team at 1:30 PM Saturday the 21st. Their findings—revealing massive underground structures—sparked global headlines this spring and will now be discussed publicly for the first time in the U.S.

- **Atlantis has been found.** The U.S. premiere of the documentary Atlantica by Michael Donnellan (Ingenio Films), is screening Saturday at 9:00 PM Saturday the 21st.

- An unprecedented **display of the impossibly precise pre-dynastic Egyptian vases**, open for public viewing during exclusive three-hour sessions on Saturday and Sunday—arguably the most comprehensive showing of such artifacts since antiquity.

A special Summer Solstice field trip to Pilot Mountain is sponsored for Friday evening the 20<sup>th</sup> to enjoy the Special Pyramidal Shadow cast by the local landmark on the first day of summer and the halfway point of the year.

Held at the Sheraton Greensboro/Koury Convention Center, Cosmic Summit 2025 is expected to draw over 500 in-person attendees, with Virtual Passes available for global viewers. Local day passes offer Triad residents a chance to engage with the world's leading independent thinkers without leaving town.
